PROFILE

Emre is a seasoned software engineer with a remarkable track record of over 12 years in application development, specializing in PHP and Javascript . Throughout his career, he has demonstrated proficiency in a wide range of frameworks and tools, consistently delivering high-quality solutions. Emre's experience working with esteemed companies has equipped him with the ability to engage effortlessly with diverse clients and teams of all sizes.

Known for his versatility, Emre considers himself a skilled full-stack developer and a dedicated problem-solver. His passion for tackling challenges enables him to efficiently drive projects to completion. Emre's expertise has been recognized by prestigious accolades, including receiving 2 Stevie Awards for creating the best new product or service of the year.

With a proven aptitude for delivering exceptional results, Emre continues to thrive in the dynamic field of software engineering, constantly seeking new opportunities to contribute to impactful projects and drive innovation forward.

WORK EXPERIENCES

Senior Software Engineer
TUI Musement | 2019-09 - Present

As a Frontend Developer at TUI Musement, I have the privilege of being part of an organization that has significantly impacted my career trajectory. Working within the Agile Scrum framework, TUI Musement has provided me with an invaluable opportunity to contribute to a project of substantial complexity and scale, collaborating with a skilled team of 11 members.

- Implementing new features, resolving bugs, and conducting code refactoring in two significant projects. These projects are built upon Vue Framework and Nuxt, and I utilize the TypeScript language to ensure robust and efficient codebase.
- Taking a proactive approach to enhance my skillset, specifically focusing on writing comprehensive unit tests and implementing clean code practices. These efforts contribute to the overall quality and maintainability of the software project.
- Embracing the Agile methodology, participating in regular scrum meetings, and collaborating closely with cross-functional teams to ensure seamless project delivery and alignment of objectives.
- Demonstrating a commitment to continuous self-improvement and staying abreast of the latest industry trends and technologies, ensuring that I am equipped with the knowledge required to excel in my role.

Lead Software Engineer
Ajans Digital | 2014-08 - 2021-08

During my extensive tenure at Ajans Digital, I played a crucial role in the development of multi-platform applications and advertisements on behalf of various esteemed pharmaceutical companies. Over the course of four years, I worked remotely with outstanding success. Notably, our client portfolio included prominent names such as GlaxoSmithKline, Roche, Bayer, AstraZeneca, MundiPharma, Takeda, Abdi İbrahim, MSD, Farmatek, Chiesi, and Santa Farma.

- While primarily working as a developer, I also assumed the role of team lead, effectively guiding and overseeing a group of three web developers.
- Successfully developed and delivered websites and Progressive Web Applications (PWAs) utilizing an array of technologies, including PHP, HTML, CSS, JavaScript, Vue.js, and SQL. This ensured highly functional and visually appealing digital experiences for our clients and their target audiences.
- Leveraged the Unity platform and C# programming language to create mobile apps, virtual reality games, augmented reality apps, and Kinect games. These solutions offered immersive and engaging experiences, aligning with the evolving technological landscape.
- Actively contributed to meetings, providing valuable insights and helping establish new practices within the development team. This proactive approach facilitated continuous improvement and innovation.

WORK EXPERIENCES CONTINUED

Senior Frontend Developer
Gen3 Creative | 2013-12 - 2014-06

During my tenure at Gen3 Creative, I held a pivotal role as a Senior
Frontend Developer. My primary responsibilities revolved around developing
websites that adhered to semantic web standards and achieving CSS coding
excellence, capable of receiving prestigious awards from notable
entities such as www.cssdesignawards.com. Notably, Gen3 Creative had a
track record of receiving multiple awards for their exceptional design work.

- Leveraged innovative JavaScript libraries such as three.js to develop captivating and
animated websites, delivering exceptional user experiences.
- Developed high-visibility, AAA-title websites, emphasizing impactful design and
seamless functionality.
- Demonstrated expertise in developing, packaging, and thoroughly testing WordPress
themes, ensuring smooth integration and user-friendly content management for
clients

Web Development Team Lead
Buzz Dijital | 2012-06 - 2013-12

At Buzz Dijital, Turkey's pioneering social media agency, I was
entrusted with the responsibility of establishing and leading my own
development team. During my tenure, I accomplished the following:

- Led and managed a team of 5 highly skilled web developers, ensuring seamless
coordination and efficient project execution.
- Demonstrated my proficiency in utilizing Facebook API and Twitter API to develop
captivating web-based games and competitions, enhancing brand engagement and
social media presence for clients.
- Expertly handled SQL queries, effectively maintaining existing web applications by
addressing bug fixes, troubleshooting issues, and implementing new features and
modifications.
- Showcased my technical expertise by developing websites from scratch for two
renowned brands in Turkey: koton.com.tr and doguscay.com.tr. These projects were
built utilizing a robust MVC based PHP framework, specifically Codeigniter.

Web Developer
Proje Calide | 2011-07 - 2012-06

Proje Calide held a prominent position as the leading agency in Turkey for creating
high-quality content catering to children. As a valuable member of the team, I played a
pivotal role in the design, implementation, and integration of 3D web-based games for
renowned brands such as Cartoon Network and Algida. Some of my notable
contributions during this period include:
Clients : Algida(Wall's), Migros, Cartoon Network, TNT TV, Clear, Alkoçlar Hotels

- Leveraged my skills in PHP, Unity, CSS, JavaScript, MySQL, and SVN to create
dynamic website environments that delivered exceptional user experiences for clients
including Algida (Wall's), Migros, Cartoon Network, TNT TV, Clear, and Alkoçlar Hotels.
- Successfully developed new websites utilizing a robust MVC based PHP framework,
specifically Codeigniter, ensuring optimized performance and maintainability.
- Collaborated closely with game developers to devise and implement effective
solutions for score management and authentication within web-based 3D games.
- Demonstrated my technical prowess by creating a real-time competition website
using Socket.io and Node.js, enabling users to engage in live, interactive competitions.

Junior Web Developer
Admin Bilişim | 2011-01 - 2011-07

At Admin Bilişim, I played a critical role in enhancing websites using the web-based
tool called Workcube Catalyst. I collaborated closely with the team to identify and
resolve workflow issues, while implementing new features to improve user
experience. Key accomplishments include optimizing websites for increased customer
satisfaction, implementing innovative features using JavaScript and Coldfusion,
serving as a liaison between the development team and customers, and showcasing
exceptional problem-solving skills through meticulous debugging.
